

**Welcome to the world of Melanstar**

MANUFACTURER OF STAINLESS STEEL SINKS AND WASHBASINS

## ABOUT US

Welcome to the Melanstar catalog - a manufacturer of stainless steel sinks!

Melanstar is a Polish company with many years of experience in the production of high-quality stainless steel sinks and washbasins. We have been successful in earning our clients' trust for many years by providing them with flawless items.

Our greatest pride is our exceptional employees, who not only have extensive industry experience, but can also communicate in many languages. This enables us to provide services to clients from around the globe and ensure that their wishes are understood and fulfilled.

We know what kind of responsibility we are taking on. We are aware that our products affect our customers' everyday lives. That is why we make sure that all sinks and washbasins that leave our factory are manufactured with the utmost care and precision. Our goal is to ensure that our products meet the highest quality standards and ensure durability and reliability for many years to come.

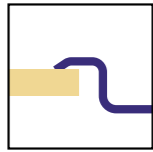

Our sinks and washbasins are characterized not only by excellent quality, but also by modern technologies. We constantly invest in the development of our products to meet our customers' expectations. This allows us to offer solutions that are not only functional but also aesthetically designed.

At Melanstar, we also value the designer look of our products. We create classic and modern designs that fit perfectly into different interiors. Our designers pay attention to details, harmony and proportions and create installations that are not only practical but also visually unique. Our offer includes a wide range of colors that allows you to adapt our products to your individual style. We offer many different options that allow you to create the perfect combination of functionality and aesthetics. Melanstar is a company that takes care of every detail. We are sure that our products will meet your expectations and help you create fantastic interiors. We invite you to take a look at our catalog and discover our unique collection.

## TYPES OF INSTALLATION

### Built-in sinks

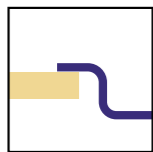

Built-in sinks are specially designed for direct installation in the kitchen worktop. Their edges protrude slightly above the surface of the worktop. Installation is done by inserting the sink from above into a suitably cut-out hole and securing it with the supplied fastening clips. This simple and practical installation method enables quick and easy installation. The clips are suitable for kitchen worktops with a thickness of 25 to 40 mm.

### Flush-mounted sinks

Flush-mounted sinks must be installed in moisture-resistant kitchen worktops such as natural stone or composite material. This installation system connects the worktop and sink into a single surface, making it easier to clean and creating an aesthetically pleasing work surface in the kitchen.

### Built-in sinks with flat edges

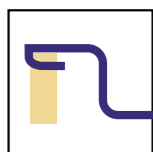

Built-in sinks with flat edges are mounted on the worktop and thus form an extension of the worktop surface. The flat, almost invisible edges make them quick and easy to keep clean.

### Undermount sink

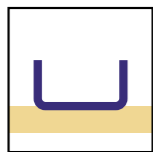

Undermount sinks are installed from the underside of a natural stone or composite kitchen countertop. The edges of the sink fit snugly into the cut-out hole in the countertop, allowing the use of larger basins in various combinations. The lack of a connection between the sink and the countertop makes it easier to maintain hygiene and improves the aesthetics of the entire kitchen.

### Overlay sinks

Overlay sinks serve as a kitchen worktop and are mounted directly on the kitchen cabinet. They can be mounted on one or two cabinets as required. Overlay sinks have a rear edge height of 30mm (with a few exceptions - see description of the individual sinks). They can also be mounted on standard worktops with a thickness of 30mm.

### Countertop washbasin

The countertop washbasin is attached to the countertop using special silicone. For this purpose, choose silicone for bathrooms, which is characterized by increased moisture resistance. Apply the product to the bottom edge of the basin, then place it on the countertop and press it firmly. Make sure that the silicone is dry and connect the entire water installation and the siphon using the appropriate accessories. When connecting the drain, first install the plug, then the siphon and finally the drain pipe. Connecting the faucet requires a bit more skill.

The numbers in the catalog correspond to the dimensions of the sink or washbasin.

Making sinks that seamlessly blend into contemporary kitchens is something we take great delight in. Our company understands exactly how important a style element is in the design of this space. Therefore, our products are characterized not only by excellent quality, but also by a modern design that gives the kitchen's interior more life and personality.

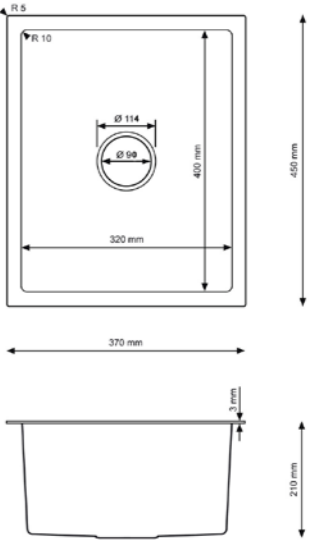

Our goal while designing our sinks is to make the kitchen feel cozy and welcoming. We believe that this is the room where loved ones gather to cook together, enjoy meals and spend time with one another. That is why our sinks are functional, comfortable to use and ensure pleasant work in the kitchen, whether we are cooking for ourselves or for others.

Our products are of the highest quality, which is our top priority. We appreciate fine craftsmanship and use only the best materials that guarantee durability and resistance to external influences. Thanks to this, our sinks are resistant to scratches, mechanical damage and corrosion.

Our assortment is based on European and Polish tests and approvals. We have made sure that our products meet all safety and quality standards on both the Polish and international markets. This enables us to guarantee our clients the satisfying experience of using our sinks.

Our range includes a wide selection of sink models that will surely meet your expectations. Regardless of size, shape or function, our sinks are the perfect addition to your kitchen. We make sure that our products are carefully developed to meet the different needs and preferences of our customers. We encourage you to get acquainted with our assortment and discover the Melanstar World - a place where modern kitchen meets high quality, functionality and design.
